Vol. 164 Nos. 1–3

TOXICOLOGY

July 8th 2001

CONTENTS

Cited in: *Biological Abstracts; Elsevier BIOBASE/Current Awareness in Biological Sciences; Cambridge Scientific Abstracts; Chemical Abstracts; Current Contents/Life Sciences, EMBASE/Excerpta Medica; Environmental Mutagene Information Center; Environmental Periodicals Bibliography; Index Medicus*

Special Issue

Abstracts of the IXth International Congress of Toxicology
8–12 July 2001–Brisbane, Australia

Guest Editor:

P.F.A. Wright

Lectures

Deichmann Lecture 1
Plenary Lectures 1
Public Lecture 2

Debates

D1. Multiple Chemical Sensitivity (MCS) is a defined clinical entity 3
D2. Low level exposures to organophosphorus esters may cause neurotoxicity 3

Symposia

S1. Hepatocarcinoma in humans: What are the risks to come? 4
S2. Autoimmune reactions and environmental exposures 5
S3. The role of diet in human cancer 6
S4. Adverse drug reaction reporting schemes: What have we learnt and where do we go from here? 7
S5. Scientific and societal issues in risk assessment 9
S6. Transcription factors and cancer 10
S7. Impact of endocrine disrupting chemicals on eco-system and human health: mechanisms and risk assessment 12
S8. Nuclear receptor activation and cross-talk with cell cycle regulation 13
S9. Ecological risk assessment as a tool for sustainable development 14
S10. Regulation of cytochrome P450 gene expression 15
S11. Human effects of chronic arsenic poisoning 16
S12. Oxidative stress 18
S13. Transgenic models in toxicology 19
S14. Neurotoxicity and neurodegeneration 20

Workshops

W1. Cell lines and recombinant enzymes as tools in toxicology 22
W2. Risk assessment—an update 23
W3. Toxicological implications of xenobiotic transporters 24
W4. Respiratory allergy: Paradoxes and controversies 25
W5. Assessing health risks of hazardous air pollutants 26
W6. Impact of endocrine disrupting chemicals on human and ecosystem health—testing strategies 28
W7. Linking epidemiology and toxicology for better human risk assessment 29
W8. Food regulatory toxicology 30
W9. Toxins of marine and freshwater origin 32

CONTENTS direct

This journal is part of **ContentsDirect**, the ***free*** alerting service which sends tables of contents by e-mail for Elsevier Science books and journals. You can register for **ContentsDirect** online at: **www.elsevier.nl/locate/contentsdirect**

W10.	Polymorphisms of xenobiotic metabolising enzymes—toxicological significance	33
W11.	Risk assessement and risk management for mining in developing countries	34
W12.	Role of apoptosis in toxicology	35
W13.	Developments in ecotoxicology and links with human toxicology	36
W14.	Toxicogenomics and proteomics	38
W15.	Safety asssessment of traditional herbal medicines: benefits and risks	39

Posters

P1A.	Clinical toxicology (treatments, antidotes, human toxic syndromes, drugs of abuse)	41
P1B.	Risk assessment; regulatory toxicology; education/information systems	49
P1C.	Metals	57
P1D.	Pesticides	76
P2A.	Anticarcinogenesis; carcinogenesis; oncogenes; nongenotoxic carcinogens	89
P2B.	Genotoxicity	97
P2C.	Immunotoxicity (immune system, hypersensitivity, autoimmune reactions)	104
P2D.	Respiratory toxicity	116
P2E.	Developmental, reproductive and endocrine toxicity	120
P2F.	Organ toxicity—skin, gastrointestinal, liver, kidney, cardiovascular, and haematopoietic systems	130
P3A.	Biotransformation (phase 1 and 2)	136
P3B.	Genetic variations in susceptibility to xenobiotics	149
P3C.	Polyaromatic hydrocarbons and dioxins (TCDD)	153
P3D.	Solvents, gases and vapors	159
P3E.	Food and natural products; complementary and traditional medicines	165
P3F.	Natural toxins (including mycotoxins and cyanotoxins)	173
P4A.	Oxidative injury (stress); lipid peroxidation; nitric oxide	186
P4B.	Apoptosis	198
P4C.	Environmental toxicology and ecotoxicology	202
P4D.	Neurotoxicity	215
P4E.	Toxicogenomics	221
P4F.	Methods	224
P4G.	Pharmaceuticals	231
	Author index	235
	Keyword index	253
